

Special Issue

Green Space Planning, Design and Governance for Enhanced Human Wellbeing

Message from the Guest Editors

Green spaces have long been confirmed to be the essential components of urban lands that can provide multiple services for human wellbeing. Many studies aim to understand which measures are impactful to optimize human wellbeing outcomes in green spaces. However, most existing studies focus on the specific characteristics of green spaces that are beneficial. To what extent active human interventions can transform green spaces for enhanced human wellbeing have not been well synthesized. This special issue aims to solicit relevant studies in demonstrating the role of landscape planning, design, and governance for enhanced human wellbeing. To draw inspiration from a wide variety of disciplines, this special issue broadly defines green spaces and human wellbeing. Green spaces can be different parks, forests, natural reserves, agricultural landscapes, etc. human wellbeing can cover basic materials for living well, physical and mental health, security, as well as good social relations. The highlighted requirement of this special issue is action-based research, which means that the included papers should have clear action implications for planning, design or governance of green spaces.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
