Special Issue

Reinvigorating Research on Housing Inequalities and Housing Price Mechanism Using Emerging Data and Technologies

Message from the Guest Editors

This Special Issue calls for papers employing innovative data sources and methodologies to reenergize the classical research topics of housing inequalities and housing price mechanisms and to advance the theorization of housing studies (on the Global South and North) in the era of big data and smart technologies. We invite contributions from various disciplines such as Land Management, Geography, Urban Planning, Real Estate, GIScience, Economics, and Computer Science. Potential themes include but are not limited to: - The role of Big Data and AITs in understanding dynamics and spatiotemporal patterns of housing markets; -Capitalization effect of neighborhood characteristics and urban amenities; - New indicators of housing divide; - Opportunities and challenges of data fusion from multiple sources for identifying housing inequalities; -Socioeconomic consequences of housing differentiation.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
