## Land and Monsoon Interactions: Physical and Societal Aspects of Asian Monsoons

### Message from the Guest Editors

The monsoon systems affect billions of people and their property from the tropics to the mid-latitudes in Asia. Significant changes in monsoon systems have been attributed to changes in both ocean and land surface characteristics. The changes in land surface properties associated with land cover and land use change (LCLUC) could affect monsoon development and dynamics. The recently abundant remote sensing data make it possible to explicitly quantify the associations between different LCLUC types and monsoon variability/extremes. Vagaries in monsoon characteristics affecting livelihood systems might lead to serious consequences like land use conversion, deforestation, rural-urban migration, and other socio-economic issues. Given the significant human, economic, social, and environmental impacts of the Asian monsoons, we invite papers that provide insight into the interactions of land surface dynamics with the physical and societal aspects of monsoon climates in Asia.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
