

Special Issue

Land Development and Management Strategies for Climate Change Adaptation

Message from the Guest Editors

This Special Issue is intended to provide an understanding of influences of climate change on land uses and values, including the techniques that can be used to assess those influences as well as the key policy tools related to land development and investment strategies that can effectively and efficiently help the most vulnerable communities from the impact of climate change. We, therefore, invite contributions covering, for example, the following topics:

- Lessons learned from different countries showing the best and/or bad practices of land management and development and their linkage to climate change;
- Innovative approaches for land management and development strategies to support climate change adaptation;
- New tools and technologies to support multi-stakeholder planning and/or collaborative management approach in land management and development processes to support climate change adaptation.

Guest Editors

Dr. D. Ary A. Samsura

Prof. Dr. Erwin van der Krabben

Dr. Kristoffer B. Berse

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
