

Special Issue

Land Use Legacies and Historical Cultural Landscape

Message from the Guest Editors

In this Special Issue, we broaden that scope to include a deep historical perspective highlighting the role of past human activities in the formation of modern ecosystems. We encourage the submission of papers that have a deep temporal perspective, with a focus on the persistence of human landscape modification and how the signal of ancient land use can be detected in the modern environment. We invite papers on a wide range of topics including, but not restricted to, landscape archaeology, historical ecology, niche construction theory, archaeobotany and palaeoecology, remote sensing, responses to climate change and land use models.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
