Land Tenure and the Future of Cities

Message from the Guest Editor

We have become an urban planet and it is estimated that cities are growing by over 1 million people per week—primarily in Africa, the Middle East, and Asia. Many new urban residents reside in informal settlements (slums) with no secure land rights. Secure land rights has long been associated with a variety of social and political rights, and economic opportunities. Yet in developed countries, millennials appear to be eschewing land ownership for alternate tenure forms. What form of land tenure makes sense for the future? Should existing forms be more widely available? Are there alternative models for these unprecedented conditions? Scholars working on these and related questions in developing, transition, and developed countries are encouraged to contribute.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
