Special Issue

Land Use in Archaeology

Message from the Guest Editors

We are creating a Special Issue on land use in archeology. We would like to invite you to submit a contribution, as we feel that you are a capable author whose voice we should like to include. Increasingly, we see anthropogenic change transforming our global landscapes. However, in the past, drastic change in ecosystems and landforms have fundamentally shaped the course of social evolution. This Special Issue focuses on archaeological results and methods that have focused on determining land use in the past. covering prehistoric and historic periods in the Old and New Worlds. Archaeologists have used a variety of fieldbased, laboratory, experimental, and desk-based approaches to understand past land use. Authors are invited to present their results and developed methods on this topic, highlighting how their work can contribute to understanding past land use. We also feel that past land use has much to contribute to modern understanding of anthropogenic change. Researchers are encouraged to link their work on past systems with modern land use concerns. Examples can derive from any region and period to the beginning of the 20th century.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
