

Special Issue

Land Use Optimisation

Message from the Guest Editor

We are encouraging papers from across the different domains that consider land use, including those that consider socioeconomic activity that takes place on land, landscape decision making, sustainable agriculture, renewable energy production, natural flood management decisions, or the tensions between different production objectives (such as food and fibre). Papers considering landscape composition in terms of the capacity to support multiple goods and ecosystem services, as well as climate-related objectives such as biofuels, are especially welcome. A number of fee waivers are available for selected articles—if you would like to be considered for one of these, please contact the , (a.comber@leeds.ac.uk).

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
