

## Special Issue

# Impacts of Land Use Pattern in Metropolitan Area

### Message from the Guest Editors

This Special Issue focuses on the general law of the impacts of land use pattern and spatial structure in metropolitan areas, as well as the mechanisms of land use formation, new data and new approaches for describing land use patterns. This Issue aims to provide new solid evidence for spatial planning and policy implication for more efficient land use in metropolitan areas, including but not limiting the following topics:

- Positive and negative impacts of land use on economic development;
- Impacts of land use on social development, including social equity, accessibility of facilities, active living, and citizens' happiness;
- Impacts of land use on ecological sustainability, including biodiversity, pollution, and carbon emissions;
- Comprehensive evaluation of the multidimensional performance of land use patterns;
- New data or new approaches for describing patterns and impacts of land use.

---

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
