

Special Issue

Climate Change and Current Challenges for Landscapes and Cultural Heritage

Message from the Guest Editors

This Special Issue will serve as a platform for the exchange of experiences among participants of the 28th conference in the series of garden art and historical dendrology titled “Climate Change and Current Challenges for Landscapes and Cultural Heritage”. We would like to focus on an important discussion related to the climate change taking place in the world, with the identification of current problems and challenges in maintaining and preserving the cultural heritage of cities, villages, and open spaces. Raising this issue may significantly increase the awareness of the benefits associated with the protection of historical heritage and the vulnerability of and hazard to these monuments. We would like to focus on tangible cultural heritage, which includes cultural landscapes, historical buildings and gardens, archaeological sites, and historical sites.

Guest Editors

Dr. Jan K. Kazak

Dr. Katarzyna Hodor

Dr. Magdalena Wilkosz-Mamcarczyk

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
