

Special Issue

Anthropic Infrastructures in the Landscape: Ecological Effects on Terrestrial Ecosystems

Message from the Guest Editors

Anthropic infrastructures are needed in society today, and more are expected to be built in the near future. They can become an important component of landscapes and can have profound effects on ecosystems. Indeed, anthropic infrastructures may function as drivers of change at several spatial and temporal scales, even more so in the case of modern infrastructures that are needed to meet the current demand of goods and services worldwide.

This Special Issue on anthropic infrastructures in the landscape aims to present a variety of studies which explore dynamics and interactions between infrastructures and any component of the environment. Contributions on conceptual, methodological, and case-based studies on this matter are welcome.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg,
AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature
and Landscape Conservation)
