

Special Issue

Landscapes at Risk. Social Capital Asset in the COVID-Scape Climate

Message from the Guest Editors

Sudden and widespread environmental fluctuations by the arising and persisting current pandemic, significantly involve the relationship between the two main existential dimensions of the settled communities—social capital and landscape—and its possible representations by means of the economic–monetary dimension as well. In view of a possible renewal of the relationship between people and the city–landscape system, very differentiated scenarios of the new territorial orders are prefigured.

This Special Issue intends to foster an in-depth reflection from researchers in converging disciplines, and at different levels (theoretical, methodological and operational), on the essence and the possible overcoming of the conflict between some specific functions of the economic sub-system and landscape quality, with specific reference to the main criticalities already existing before the pandemic and to the possibility—prefigured by the new restraints—to rebuild their connections in order to reduce the landscape risk.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
