

Special Issue

Landscape Transformation and Changes in Land Use Intensity

Message from the Guest Editors

This Special Issue on “**Landscape Transformation and Changes in Land Use Intensity**” aims to look for answers on how land use intensification, abandonment or extensification processes affect the delivery of ecosystem services and habitat support for biodiversity, presenting a relevant opportunity for a wide international and multidisciplinary community, including landscape ecologists, social scientist or geographers, to share their knowledge. Progresses in understanding local to global patterns, drivers, and socioecological implications of these changes are welcome. We also seek integrative studies regarding sustainable, innovative, and adaptive responses to reverse harmful ecological and social effects due to land use intensity changes, including ecological restoration experiences and socioecological bases for designing tomorrow landscapes.

Guest Editors

Prof. Dr. Andreu Bonet-Jornet

Prof. Dr. Carlos T. López De Pablo

Prof. Dr. César Agustín López Santiago

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg,
AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature
and Landscape Conservation)
