

## Special Issue

# Governance, Values, and Conservation Processes in Multifunctional Landscapes

### Message from the Guest Editors

In this thematic Special Issue, landscape conservation provides an interesting spatial extent for observing generalizable ecological terrestrial and aquatic processes while still providing the granularity to understand the local context. The diversity of human value systems that shape policy and governance structures, combined with the call to understand these value systems as relational, and context-dependent (IBPES), necessitates the understanding of research done at a landscape scale. The understanding and promotion of a spectrum of relational values may provide additional policy alternatives that result in an increased ability to meet conservation goals locally, regionally, and globally. For this Special Issue, we invite papers focusing on, but not limited to, the following topics:

- Landscape-scale governance to link terrestrial and aquatic biodiversity conservation initiatives;
- Relational values and landscape conservation;
- Processes for decision making in landscape conservation;
- Evaluation of policy outcomes and impacts on landscape conservation;
- Metrics for understanding multifunctional landscapes;
- Nature's contributions to people at landscape scales.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
