

## Special Issue

# Agricultural Land Use and Food Security

### Message from the Guest Editors

The research topics of this Special Issue include the extraction of cultivated land use information in typical regions, analyses of the causes of cultivated land use changes, assessments of the productivity effect of cultivated land use change, cultivated land marginalization and rational utilization strategies in mountainous areas, and cultivated land use scenario prediction. The purpose of this Special Issue is to comprehensively understand the changes induced cultivated land use and their impact on food security at the global and regional levels as well as to provide suggestions for the rational use of cultivated land and food security. Suggested themes:

- Extraction of cultivated land use information in typical regions;
- Causes of cultivated land use changes;
- Assessment of the productivity effect of cultivated land use changes;
- Cultivated land marginalization and rational utilization strategies;
- Cultivated land use scenario prediction.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
