

## Special Issue

# Management and Conservation of Forest Biodiversity

### Message from the Guest Editor

The diversity and conservation of the forests of the planet are getting worse every day, as a consequence of excessive deforestation and fires; scientific research needs to assess the state of conservation. Forests act as sinks for CO<sub>2</sub>, helping to mitigate climate change. The use of forests must be balanced; exploitation and conservation must be combined. The analysis of its biodiversity, structure, and function is essential for its knowledge. For this reason, forums for scientific debate on the forests of the planet are needed. We invite each author to contribute by submitting one or more articles that serve to promote scientific debate, analyze, and manage the diversity of forests in a balanced way.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
