

Special Issue

Multiscale Geospatial Approaches for Landscape Ecology

Message from the Guest Editors

Submissions sharing thematic threads will provide additional organizing opportunities. One such thread is ecology of human interactions with landscape elements whereby site-specific data are collected by various authorities and/or interests that require assembly and integration to obtain sub-regional views. Another is multiple monitoring emplacements under the aegis of different operatives, involving data streams from automated sensors and/or scheduled visitation. Still another is allocation of plots/points/etc. for special augmentation of coarse resolution data, perhaps to support spatial modeling of habitats or eco-economic aspects of impacts and opportunities where the modeling entails varying degrees of statistical sophistication regarding data dependencies.

Guest Editors

Prof. Dr. Wayne Myers

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
