

Special Issue

Dynamic of Natural Ecosystems under Anthropogenic Disturbances

Message from the Guest Editors

Human activities have significantly disturbed the stability of terrestrial ecosystems. Of these, urban ecosystems in coastal wetlands are the most sensitive to human disturbances. Understanding the dynamics and sensitivity of coastal wetlands and urban green spaces, predicting their future development, finding solutions to environmental and land-use problems, and developing strategies for adaptation to the changing climate and human activities are critically important. For this Special Issue, we will describe how urban ecosystems of coastal wetlands and urban green spaces are dealing with climate change, human activities, and species invasion by using theoretical analysis, new research methods, observational data, and predictive modeling. We welcome papers based on fieldwork for case studies or comparative work, at different levels (single-point experiment, spatial analysis, and meta-analysis) and across different contexts.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
