Special Issue

Parks and Protected Areas: Mobilizing Knowledge for Effective Decision-Making

Message from the Guest Editors

Parks and protected areas provide essential services for nature conservation, visitor recreation, local economies, Indigenous cultures, and human wellbeing. Park managers make difficult decisions to achieve their diverse mandates, and need up-to-date, relevant, and rigorous information. Evidence-based management is important, but access to, and effective use of, current research provided by social scientists, natural scientists, local people, or Indigenous peoples, is an ongoing challenge.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
