

Special Issue

Participatory Forest Management towards Climate Governance: Frontiers and Challenges

Message from the Guest Editors

Participatory forest management, which is synonymous with community/collaborative/joint/collective/social forest management, has already become a popular concept for extending social, economic and environmental services. In this regard, it is particularly important to understand how various instruments of participatory forestry contribute to the governance of global climate change adaptation and mitigation.

Consequently, it would be interesting to investigate the policy, politics and practices spanning international to local perspectives. For forest management and climate governance to be meaningful, any short- and long-term technical, cultural, political, economic and ecological limits of understanding and challenges must be explored, evaluated and addressed.

The Special Issue focuses on determining how various factors and elements of participatory forest practices set the limit and direction for governance of climate policy. Additionally, what factors act on limiting the synergies, and what should be the practical strategies for addressing such challenges in order to bring transformative changes.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
