

# Special Issue

## Land, Environment, and Policy

### Message from the Guest Editors

Humanity is reliant upon land resources for the provision of food, energy, water, and ecosystem services.

Understanding land resources, land use, their relationships with environment, and related policies is vital. Despite its importance, large knowledge gaps related to land-environment-policy relationships exist.

This Special Issue will assemble researches that present innovative methods and insights that can improve our understanding to land-environment-policy relationships. In this Special Issue, we invite papers focusing on, but are not limited to, the following topics:

- modeling/mapping land use spatiotemporal change, interactions between lands and environmental systems;
- evaluating land use and environmental policies, as well as their influences on land use and environmental outcomes;
- mapping impacts of environmental pollution and human activities on land sustainability.

Dr. Chuanrong (Cindy) Zhang

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
