Special Issue

Property in the Space: Real Estate Spatial Analysis, Land Use, Urban-Rural Interactions, Management and Valuation

Message from the Guest Editors

This Special Issue focuses on the urban and rural real estate development perspectives in terms of social, economic, and environmental impact. The multidimensionality of real estate creates an opportunity to present interdisciplinary research, as the area of W real estate market research is a multifaceted platform for many scientific disciplines. We encourage the authors to submit manuscripts on theoretical and practical solutions to spatial conflicts, taking into account the specificity of real estate. The previously mentioned topics are recommended, but the Special Issue is not limited to them. We believe the results of studies on the impact of the Covid-19 pandemic on property prices and land use, as well as gender discrimination and inequality in the acquisition of property rights could be expected.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
