

Special Issue

Urban Regeneration and Sustainable Construction Management

Message from the Guest Editors

Urban regeneration is entering the era of sustainability, where large-scale physical change is no longer the focus. Sustainable construction management, such as collaborative governance, public engagement, and green technology, are inevitably taken into consideration. Up to now, plenty of research has contributed to achieving urban sustainable development goals (SDGs) in the context of urban regeneration. In urban regeneration, the connotation of sustainable construction management not only highlights the practices from the micro project to macro urban scope by involving large-scale stakeholder groups but includes the rethinking of sustainable pathways from a dynamic and comprehensive perspective.

The scope of this Special Issue includes, but is not limited to, the following topics:

- Rethinking construction management in the agenda of urban regeneration;
- Sustainable construction management and approaches for urban regeneration;
- Sustainable urban resilience;
- Planning and design of urban regeneration;
- Urban health and project management;
- Collaborative governance and public involvement;
- Community management in urban regeneration.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
