Ecosystem-Based Regional Planning

Message from the Guest Editors

This Special Issue of *Land* on “Ecosystem-based Regional Planning” is devoted to advancing our understanding and management capabilities of regional ecological systems across marine, coastal, and terrestrial domains. We invite contributions on regional planning that explore linkages, dependencies, and feedbacks operating across regional nested spatial structures, human drivers, and ecosystem responses. Research areas may include (but are not limited to) the following: We invite contributions that address the structure, scale-dependence, human–ecosystem linkages, and drivers, including climate change, across the domains, and across ecosystem components such as species, functional communities, habitats, and processes.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
