Special Issue

Towards Sustainable Residential Landscape Designs

Message from the Guest Editors

With the increasing trends in urbanization and the influence of landscapes on humans and the environment, encouraging the adoption of sustainable landscapes enables improving lifestyle qualities while minimizing potential environmental consequences. The aim of this Special Issue is to bridge the gap between environmental conservations elements in residential landscape designs and relevant socio-economic factors. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Consumer perceptions of sustainability-driven landscape attributes;
- Effects of price and non-price urban landscaping policies on households' behaviors;
- Preferences and valuation for low-input residential landscapes;
- Landscape aesthetics and maintenance perceptions;
- Preferences and valuation for native plants in landscape designs;
- Preferences and valuation for pollinator friendly landscape attributes;
- Preferences and valuation for low irrigation partial turfgrass lawns;
- Sensor-based lawn maintenance technology adoption;

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief
