

Special Issue

Rural Land Management Interaction with Urbanization

Message from the Guest Editors

This Special Issue focuses on how recent urbanization processes modifies the organization and management of the land uses at integrated rural areas in peri-urban and intra-metropolitan areas at local, national, and global levels.

Recent rural dynamics are primarily characterized by three interrelated trends: economic diversification, deagrarianization, and depopulation; the first two of which common to all rural areas.

It is true that deagrarianization and the simultaneous shift towards a service economy in present-day rural economies and societies have not led to the disappearance of rural space but instead some rural areas are presenting extraordinary territorial and economic transformation. These comprise zones that fall between the countryside and the city where intensive rural urbanization or peri-urbanization processes are taking place.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
