Economic, Social and Demographic Challenges of Rural Areas: Contributions From the Analysis of the Economic Activity Location and the Study of Depopulation

Message from the Guest Editors

Research on rural development has grown exponentially in recent decades, being one of the most notorious fields in regional science addressed by economists, geographers, demographers and even political scientists. At the same time, depopulation studies have undergone a similar evolution, this being a phenomenon with negative consequences not only in the economic sphere, but also in the social and political sphere, given its importance for the future and survival of the rural environment. In this sense, this Special Issue will explore the link between geography, demography and the economy as a key point in the search for solutions to the challenges faced by the rural world in the next few years. From a general perspective, this Special Issue is open to the presentation of theoretical and / or applied papers, with the goal of bringing together quality works on new forms for promoting rural development, industrialization and outsourcing of rural environments, effects of economic development on rural depopulation, and even institutional aspects that can affect the different dimensions of depopulation.

Guest Editors

Dr. Francisco Manuel Parejo-Moruno

Dr. Antonio Miguel Linares Luján

Dr. José Francisco Rangel Preciado

Dr. Esteban Cruz Hidalgo

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
