Special Issue

Rural Landscapes - Challenges and Solutions to Landscape Governance

Message from the Guest Editors

Rural landscape dynamics are challenging existing policy regimes and new approaches to landscape governance regimes are called for. The underlying driving forces for landscape change are increasingly interlinked and globalized. Policy regimes are functioning at multiple levels across sectors. Some domains have been de-regulated, such as agricultural policies; others have expanded, such as nature conservation and natural resource policies; and others. again, have been decentralized, such as land-use planning-all adding to the complexity of change and regulation. Finally, rural communities themselves have changed because of various combinations of in and out migrations, and often find themselves locked in between influence from outside forces and internal social and cultural segregation.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
