

Special Issue

Rural Space Modeling

Message from the Guest Editors

Dynamically growing new technologies (e.g. multi-criteria methods, GIS tools) are gaining popularity all over the world as tools for spatial analysis. This Special Issue focuses on the practice and theory of the application of modern technologies in rural space modelling and rural area development planning. The authors are requested to submit papers on modern research directions of rural space modelling in such domains as spatial planning, spatial order, spatiotemporal analysis, land use change or environmental aspects, etc. The integration of different data, GIS tools and modelling can provide valuable support to rural space modelling and decision-making. Papers incorporating novel and interesting techniques in studying these aspects, as well as some interesting applications, will be considered. Well-prepared review papers are also welcome. We invite all prospective authors to share their research.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
