

Special Issue

Place-Based Urban Planning

Message from the Guest Editors

Places have long been linked to feelings of belonging, meaning, and attachment, related to individuals' interactions and social exchanges in an urban location. In a digital society, places can mediate how information is used and exchanged between people who share a sense of place-based belonging. For this Special Issue, we are interested in either empirical or conceptual/theoretical contributions linking methods for characterizing and mapping sense of place, smart technologies, and the understanding of complex urban dynamics or any key urban processes, including, but not limited to:

- Place-based knowledge extraction methods;
- Public participation using place-based technologies;
- Characterizing sense of place for understanding urban dynamics;
- Multiscale representation and mapping sense of place;
- Spatial analysis methods for smart cities;
- Spatial information systems;
- Uncertainty and fuzziness of spatial representation;
- Emerging technologies of place-based urban data processing (deep/machine learning and geosemantic algorithms).

Guest Editors

Prof. Dr. Stéphane Roche

Prof. Dr. Mir Abolfazl Mostafavi

Dr. Rob Feick

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
