Smart Land Administration and Modern Cadastre: New Frontiers

Message from the Guest Editors

This Special Issue contributes to the new frontiers of smart land administration and modern cadastre, based on technological innovations to meet the rapidly changing requirements of the societies. The current land administration and cadastral systems are not smart enough to satisfy the stakeholders' expectations and maximize the property industry's economic return. The examples include a lack of support for utilizing 3D digital data, accessing a fully digital end-to-end land development workflow, removing delays and inefficiencies in the current planning and building approval processes, and handling real-time and big data. On the other hand, there are emerging boundaries in smart technologies. This Special Issue focuses on scientific and technical approaches for leveraging technological innovations to support smart land administration and modern cadastral systems. Moreover, innovative approaches for attracting the next generation of students to pursue academic education in the land administration domain, as well as creative land administration educational methods, are of interest to this Special Issue.

Guest Editors

Dr. Hamed Olfat

Prof. Dr. Abbas Rajabifard

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
