

Special Issue

Soil Biodiversity in Agricultural Ecosystems

Message from the Guest Editors

This Special Issue gathers research aiming to better understand soil biodiversity as it is affected by different conditions in agricultural systems, as well as its role in the future of food production. We welcome research on the following topics, from lab- and field-oriented as well as theoretical and/or modelling studies:

- Soil biodiversity in agricultural systems affected by different factors: soil types, soil threats, climate conditions and climate change, land use/land cover and land use change, different soil management practices, etc.
- Link of soil biodiversity to soil fertility and crop production.
- Soil biodiversity indicators and soil quality measurements.
- Modelling of soil biodiversity and soil ecosystems.
- Soil biodiversity and ecosystem services.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
