

Special Issue

The Science and Practice of Soil Health for Versatile Sustainability

Message from the Guest Editors

Soil is an important natural resource that contributes to ecological functions, such as nutrient cycling, carbon storage and transformation, water regulation, chemical buffering and filtering, habitat and food for soil microbes and waste recycling, which are significant for achieving the United Nations' Sustainable Development Goals (SDGs). To achieve sustainable soil health management, various services provided by soils need to be conserved, maintained and promoted without any reduction in function. More specifically, sustainable soil health management includes minimising soil erosion, diversifying production systems, the application of integrated amendments (organic and chemical), the promotion of soil biodiversity and adaptation to climate change. This Special Issue on "**The Science and Practice of Soil Health for Versatile Sustainability**" aims to highlight the urgency of maintaining healthy soils with in-depth studies detailing concepts, and in translating science to practice.

Guest Editors

Dr. Amitava Rakshit

Dr. Vijay Singh Meena

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
