

Special Issue

Conditions, Effects and Costs of Spatial Chaos

Message from the Guest Editors

This Special Issue is dedicated to one of the most serious problems of local and regional development in the urbanized world, which is the chaotic and inefficient growth of various types of settlement systems:

- Theoretical concepts and terminology of the phenomenon of spatial chaos at various geographical scales
- Methodology of the research approaches to the processes related to spatial chaos, including proposals for new indicators and measures describing it
- Examples of research on urban sprawl:
- Estimation of specific costs (monetary, temporal, areal, etc.) related to the phenomenon of spatial chaos
- Good practices in combating and mitigating spatial chaos processes. In this case, we do not refer to typical case studies, but rather synthetic and review papers
- "Typical" places of spatial chaos (e.g. suburban zones, transport corridors, tourist areas), but investigated in longer time series or within the context of larger areas
- Atypical, relatively poorly recognized places of occurrence of urban sprawl/peri-urbanization, e.g., for areas of the world from where there is little research on this subject

Guest Editors

Prof. Dr. Przemysław Śleszyński

Dr. Piotr Gibas

Dr. Paweł Sudra

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
