

## Special Issue

# Terraced Landscapes as Models of Ecological Sustainability

### Message from the Guest Editors

Creating terraced landscapes has made large sloping areas productive and has conserved soil, water, and ecosystems. Awareness of terraced landscapes is growing considerably at the global, European, and national levels. Research, academic studies, civil initiatives (e.g., International Terraced Landscapes Alliance (ITLA)), important recognitions (e.g., terraced landscapes listed as UNESCO World Heritage Sites), and various documents about terraced landscapes have intensified in recent decades. Terraced landscapes worldwide have been exemplary experimentation sites for the domestication of food crops all over the world. The special issue of the journal *Land* aims to extend the previous findings of the PB perspective and focus primarily on two additional premises: that terraced landscapes are models of ecological sustainability and that actors involved in terraced landscapes play a supporting and crucial role in this process, either as residents or builders of terraced areas.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
