

Special Issue

Tourism and Employment in Urban Development

Message from the Guest Editors

Sustainable development has become an essential aspect of scientific studies in the field of economics. This Special Issue aims to highlight tourism employment analysis under a sustainable development approach in the context of economic growth and urban development. Sustainable tourism has been driving important urban changes. Currently, the smart city concept's applicability to tourism activity and promotion is particularly relevant for enabling tourist destinations to achieve qualification as smart destinations. Sustainable tourism would be linked, in this sense, to a model of urban planning and management that uses technology to improve energy efficiency and reduce environmental impacts. This issue is framed as a contribution to innovations that link the tourism sector in cities to the achievement of the Sustainable Development Goals (SDGs), ensuring that this sector's growth and development is smart, sustainable, and socially responsible and generates decent work opportunities.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
