

Special Issue

Use of Natural and Cultural Resources through Tourism Activity for Regional Development

Message from the Guest Editors

Resources/natural heritage, together with resources/cultural heritage, must be protected, preserved, restored, and passed on to future generations as part of the cultural and natural heritage of humanity. One of the ways to achieve this objective is by using and enhancing these resources through tourist activity. There are several benefits to be obtained when focusing on natural and cultural wealth as attractions of tourist interest: the recovery or conservation of heritage, regional or local economic growth focused on the commercialization of resources, social benefit for communities by improving living conditions, etc. Therefore, natural and cultural heritage becomes an element capable of generating socioeconomic benefits of great relevance for the development of societies through its use by tourism. The scope of this Special Issue is broad, and manuscripts presenting conceptual and/or empirical work from all areas of knowledge on the use of natural and cultural resources by tourism are welcome. We welcome original research articles offering interesting empirical insights and novel theoretical contributions, as well as review articles.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
