Why Urban Agriculture Matters

Message from the Guest Editors

Urban Agricultures (UA) represents a myriad of production techniques that vary from fully commercialized factories or greenhouses with hydroponic systems to experimental Zfarming, cooperatively organized allotments, private home gardens and placements of single baskets in the back yard or at the balcony. UA supplies fresh and healthy foods to households, markets, restaurants, and grocery stores while saving on transport mileages; empowers the poor by broadening their food safety networks and generating some income; encourages social cohesion and contributes to a pleasant environment by transforming grey cities to green. Yet, despite the multitude of advantages, UA has not been developing at the expected speed. It is difficult to find suitable places where land and water is available and the competition with built-up initiatives can be settled. Moreover, some cities have prohibitive policies and ordinances that stymie UA initiatives. Tackling this issue requires a deeper understanding of the main constraints that block UA expansion. The journal *Land* challenges you to contribute to a Special Issue that should support the development of UA to its full potential.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
