

Special Issue

Urban Ecosystem Disservices across Heterogeneous Urban Landscapes

Message from the Guest Editors

Building on the influential works on ecosystem disservices generally, and urban ecosystem services in particular, this Special Issue seeks to bring together perspectives and empirical studies across heterogeneous urban landscapes around the globe.

Specifically, we seek contributions on urban ecosystem disservices that provide a (i) more current understanding from a broad array of geographies, and (ii) integration of concepts and framings. Theoretical, conceptual opinion, review and empirical contributions are encouraged from established and early-career researchers from across and between the health, social, economic, natural, and inter- and transdisciplinary sciences. Whilst framing of ecosystem disservices is required of the papers to be published in this Special Issue, we welcome contributions from fields that have historically examined the harms that environmental processes and phenomena have been dealt in certain regions or communities, but that have not traditionally been termed ecosystem disservices. We also welcome submissions focusing on a variety of taxa and greenspaces.

Guest Editors

Prof. Dr. Charlie Shackleton

Prof. Dr. Dagmar Haase

Dr. Lara Roman

Dr. Peer von Döhren

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
