

Special Issue

What Is Next for Urban Landscape Ecology?

Message from the Guest Editor

Urban landscape ecology is the study of the interaction between environmental (abiotic and biotic) spatial heterogeneity and the distribution and abundance of organisms in landscapes dominated by urban land uses. The intent of this Special Issue is to highlight the most pressing research needs in urban landscape ecology given the rapid rates of urban land use change and projected species declines. Papers that address the most important research questions in the field, illustrate the utility of established or new conceptual or methodological approaches, or showcase fundamental patterns or processes that deserve more attention are most welcome. The scope of this Special Issue is global and multi- and transdisciplinary. Research from underrepresented geographical regions and underrepresented participants in science is highly encouraged, as is research from across the spectrum of practice.

Guest Editor

Dr. Sara A. Gagné

Associate Professor, Department of Geography and Earth Sciences,
University of North Carolina at Charlotte, Charlotte, NC 28223, USA

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
