Special Issue

Wetland Construction and Restoration: Design and Performance

Message from the Guest Editors

Wetlands have long been recognized for the critical role they play in providing and maintaining ecological services which we depend on. Even so, the quality and quantity of wetlands have declined globally in the face of anthropogenic development. Through thousands of construction and restoration projects around the world, much has been learned about the design, engineering, performance, and sustainability of wetland ecosystems. The journal *Land* presents a Special Issue entitled "Wetland Construction and Restoration: Design and Performance", which is open to researchers interested in this field. Specific topics include, but are not limited to:

- Constructed wetlands for wastewater treatment;
- Design specifications and functional performance;
- Performance indicators and evaluation;
- The sustainability of constructed wetlands;
- The ecological function of restored wetlands;
- Landscape features that influence restored wetlands;
- Wetland restoration techniques and outcomes;
- The mitigation process and assessment;
- The ecological economics of built wetlands.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
