

Special Issue

Wildlife Protection and Habitat Management: Practice and Perspectives

Message from the Guest Editors

We invite you to send your contributions to a Special Issue of *Land* focusing on Wildlife Protection and Habitat Management: Practice and Perspectives. The aim is not just revisiting again classic topics in the area (such as keystone species, habitat fragmentation, PVAs, etc), but to critically review what has been successfully done, and which have become critical issues requiring the allocation of both human efforts, and economic resources to tackle new or increasing biodiversity threats.

We will work keeping in mind these two driving ideas: a) the importance of conducting good scientific studies (i.e. accessing reliable scientific information) to design and implement effective wildlife and habitat management, and b) that achieving the goal of sustainable development needs the contribution and expertise of wildlife and habitat management specialists. This Special Issue is an opportunity to squeeze and spread the experience from previous and ongoing studies worldwide. It surely will be very welcome and will offer a good picture of "what is cooking" in the field.

Guest Editors

Prof. Dr. Juan F. Beltrán

Dr. Pedro Abellán

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief
