Within research on heritage languages, work on Spanish has played a special role. Many insights into the nature of heritage language grammars have emerged from studies of Spanish, and Spanish will continue to be central to understanding heritage languages and their acquisition.

As the field expanded, it arrived at a time to take stock, and several recent publications have reviewed the state of the science and outlined future avenues for research. In this landscape, the time is right to consider how new research on Spanish as a heritage language can take those next steps.

This special issue collects innovative work on heritage Spanish, with the aim of contributing to the next phase of research on heritage languages and their acquisition. Interested authors should visit <https://www.mdpi.com/journal/languages/special_issues/spanish_heritage> for information on contributing. Abstracts are requested by April 15, 2020, and the manuscript submission deadline is August 31, 2020.
