# Semantics and Meaning Representation

### Message from the Guest Editors

This *Languages* Special Issue ***Semantics and Meaning Representation*** focuses on the new challenges that current research on semantics and meaning representation of natural languages must tackle to provide the grounds for today's interdisciplinary needs concerning data science, machine learning, knowledge organisation or artificial intelligence. Semantics and meaning representation come hand-to-hand in the context of language modeling and processing but also when it comes to dealing with the organisation and use of knowledge. The way natural languages convey information and knowledge requires the representation of the meaning of lexical, syntactic, or pragmatic units, and the representation of the concepts in which the meanings are anchored. But it also requires the understanding on how lexical and conceptual systems interact and how their units are related to each other, allowing dynamic and context-sensitive reasoning, wide-ranging and versatile resources, and interoperability...

## About the Journal

### Message from the Editorial Board

*Languages* (ISSN 2226-471X) is now in its eighth year since its inception in 2015. It is an Open Access journal which seeks to stimulate debates on key issues in languages and linguistics. We welcome papers at the cutting edge of different fields, ranging from applied linguistics to descriptive and theoretical linguistics. Submissions may consist of research articles and critical reviews as well as proposals for Special Issues where multi-disciplinary approaches and different perspectives on current issues are explored. We invite you to consider *Languages* as a forum for sharing your work.
