## New Advances in Chinese Formal Semantics

### Message from the Guest Editors

The journal *Languages* is pleased to announce a Special Issue focused on recent developments and advances in Chinese formal semantics. The guest editor is currently the chief expert leading the prestigious major project *Chinese Studies of Formal Semantics and Theoretical Innovation of Formal Semantics* (funded by the National Office for Philosophy and Social Sciences of China). This major research project aims to establish a comprehensive Chinese research database of formal semantics and carry out a more precise and detailed investigation of Chinese major linguistic phenomena using formal semantic tools. Using the major project as a platform, the goal of this Special Issue is to bring together work that sheds new light on the following interesting topics of Chinese formal semantics:

- Reference and quantification in the domain of individuals
- Focus-sensitivity and the representation of information structure
- Question semantics and interrogative structures
- Reference and quantification over events and degrees
- Intensional semantics including modality and propositional attitudes
- Intra/cross-linguistic semantics

## About the Journal

### Message from the Editorial Board

*Languages* (ISSN 2226-471X) is now in its eighth year since its inception in 2015. It is an Open Access journal which seeks to stimulate debates on key issues in languages and linguistics. We welcome papers at the cutting edge of different fields, ranging from applied linguistics to descriptive and theoretical linguistics. Submissions may consist of research articles and critical reviews as well as proposals for Special Issues where multi-disciplinary approaches and different perspectives on current issues are explored. We invite you to consider *Languages* as a forum for sharing your work.
