

Special Issue

The Morphosyntax and Morphosemantics of Pluractionality

Message from the Guest Editor

I invite the submission of proposals for contributions to this Special Issue, entitled “The Morphosyntax and Morphosemantics of Pluractionality”. The goal of this Special Issue is to showcase current research on pluractionality that explicitly engages with core questions in this field, e.g., what are the boundaries of the concept of *pluractionality*, and what makes some phenomena hard to classify? How do pluractionality parameters interact with other semantic domains (cf. Cusic’s relative measure parameter, which involves notions of degree or intensification and relates to general expectations)? Are there recurrent patterns in diachronic sources of pluractionals (cf. Frajzyngier 1997)? Should pluractionality be treated as belonging within grammatical aspect or rather as lexical aspect/*Aktionsart*? How has the study of pluractionality deepened our knowledge of events, especially regarding the notions of *identity* and *difference* in this domain? This Special Issue also welcomes contributions that advance our understanding of the relation between pluractionality and notions like distributivity and reciprocity.

About the Journal

Message from the Editorial Board

Languages (ISSN 2226-471X) is now in its eighth year since its inception in 2015. It is an Open Access journal which seeks to stimulate debates on key issues in languages and linguistics. We welcome papers at the cutting edge of different fields, ranging from applied linguistics to descriptive and theoretical linguistics. Submissions may consist of research articles and critical reviews as well as proposals for Special Issues where multi-disciplinary approaches and different perspectives on current issues are explored. We invite you to consider *Languages* as a forum for sharing your work.

Editors-in-Chief
