

Special Issue

Facets of Greek Language

Message from the Guest Editors

We are pleased to announce a Special Issue of Languages titled "Facets of Greek Language". Investigating the various aspects of the Greek language deepens our understanding of its structure, rules, and patterns and allows us to explore the unique features of Greek grammar, syntax, phonology, morphology, and semantics. This contributes to broader linguistic theories, helping to uncover the universals and specificities of language. The investigation of various facets of the Greek language across the lifespan, encompassing typical and atypical populations, developmental and acquired disorders, and clinical aspects, provides valuable insights into the intricate nature of language processing and functioning and allows for a comprehensive comprehension of the Greek language and its manifestations in diverse populations and contexts.

About the Journal

Message from the Editorial Board

Languages (ISSN 2226-471X) is now in its eighth year since its inception in 2015. It is an Open Access journal which seeks to stimulate debates on key issues in languages and linguistics. We welcome papers at the cutting edge of different fields, ranging from applied linguistics to descriptive and theoretical linguistics. Submissions may consist of research articles and critical reviews as well as proposals for Special Issues where multi-disciplinary approaches and different perspectives on current issues are explored. We invite you to consider *Languages* as a forum for sharing your work.

Editors-in-Chief

Prof. Dr. Jeanine Treffers-Daller

Department of English Language & Applied Linguistics, University of Reading, Reading RG6 6AH, UK

Prof. Dr. Anthony Pak-Hin Kong
