

Special Issue

Exploring the Syntax-Semantics Interface in the Romance Languages

Message from the Guest Editor

The aim of this Special Issue is to further explore this growing area of research by discussing a range of constructions in Romance in which the way syntactic form relates to semantic interpretation plays a crucial role. Contributions are expected to be formulated in terms of current generative theory or in terms of an alternative framework that allows for a clear comparison between the two. Primary empirical support should be drawn from at least one Romance language, although further argumentation based on non-Romance languages is welcome.

About the Journal

Message from the Editorial Board

Languages (ISSN 2226-471X) is now in its eighth year since its inception in 2015. It is an Open Access journal which seeks to stimulate debates on key issues in languages and linguistics. We welcome papers at the cutting edge of different fields, ranging from applied linguistics to descriptive and theoretical linguistics. Submissions may consist of research articles and critical reviews as well as proposals for Special Issues where multi-disciplinary approaches and different perspectives on current issues are explored. We invite you to consider *Languages* as a forum for sharing your work.

Editors-in-Chief
