Developments in International Insolvency Law: Trends and Challenges

Message from the Guest Editor

International insolvencies have seen many interesting developments in recent years, including:

- In the development of restructuring tools, including prepacks, and cross border insolvency processes in recent years;
- Many developments at EU level including an ambitious programme of harmonisation of selected areas, as well as work by other international groupings and organisations;
- There have been common issues around crypto insolvencies, insolvencies of wide public impact, including distressed local public entities, and controversies around third-party releases;
- There have been different approaches to the treatment of stakeholders in insolvencies and efforts to develop normative frameworks to balance different rights, including in cross border insolvencies;
- Emerging technologies have also presented opportunities and challenges for insolvency laws.

These are just a few potential areas that illustrate some of the trends and challenges of insolvency law in an international context.

About the Journal

Message from the Editor-in-Chief

Laws is an international, open access journal featuring rigorous scholarship on critical developments in governance, courts, agencies, and social order. Analysis and synthesis, theory and practice, and empirical and doctrinal work have appeared in the journal; contributions that bridge these traditional boundaries are particularly welcome. The social sciences and humanities generate insights both from and for the legal system. While theory grounds *Laws* in a timeless dialogue shaped by traditions of inquiry, legal practice ensures that scholars are addressing pressing problems. Both normative and positive scholarship can aid policymakers, judges, and agency officials. *Laws* brings together the work of theorists and practitioners, and a diverse range of empirical researchers, to promote the progress of foundational legal norms.

Editor-in-Chief

Prof. Dr. Patricia Eastaerl
