

Special Issue

Technology and Economics Law in Energy Markets and Environmental Problems

Message from the Guest Editors

In recent years, the rapid technological evolution and the emerging scaling up of technologies for energy production have become determinant factors in the development of national, European, and international law.

In this Special Issue of *Laws*, original research articles, reviews, and follow-up studies of contemporary topical, national, and international law are welcome, where research areas may include (but are not limited to) the following dimensions: (1) from the European Union and international contexts and the accompanying regulations regarding diffusion of renewables-based technologies in both energy markets and industrial or manufacturing sectors; (2) from the side of countries (global coverage) that are looking at the interrelation of international, EU, and national legislations on energy and its marketing routes; (3) from the side of manufacturing companies or commercial SMEs on extroversion and internationalization orientation that are characterized by the rapid shift from conventional technologies toward smart, innovative, and flexible modes of energy production.

We warmly look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Laws is an international, open access journal featuring rigorous scholarship on critical developments in governance, courts, agencies, and social order. Analysis and synthesis, theory and practice, and empirical and doctrinal work have appeared in the journal; contributions that bridge these traditional boundaries are particularly welcome. The social sciences and humanities generate insights both from and for the legal system. While theory grounds *Laws* in a timeless dialogue shaped by traditions of inquiry, legal practice ensures that scholars are addressing pressing problems. Both normative and positive scholarship can aid policymakers, judges, and agency officials. *Laws* brings together the work of theorists and practitioners, and a diverse range of empirical researchers, to promote the progress of foundational legal norms.

Editor-in-Chief
